SUMMARY

Elite Lead Full Stack Engineer and expert AI Architect with 4+ years of experience building autonomous systems and scalable web architectures. Pioneer in engineering custom multi-agent workflows, training context-aware LLM pipelines, and executing deep tool-adoption matrices via Antigravity IDE, Claude, and Google AI Studio. High-velocity developer maximizing production velocity to build robust, intelligence-driven application ecosystems.

EXPERIENCE

Lead Full Stack Engineer

Auto Spark 🌐

April 2024 – Present

Rajshahi, Bangladesh

- Migrated a legacy platform into a bilingual automotive application using Next.js, Supabase, and agentic code generation within Antigravity IDE and Claude.
- Engineered self-healing full-stack workflows including autonomous booking validation systems, API-driven transactions, and secure data sync pipelines.
- Enhanced application performance by 40% via code-splitting, SSR optimization, and automated LLM monitoring systems designed in Google AI Studio.

Full Stack Developer (Remote)

Hire My Tech 🌐

Aug 2022 – July 2023

Dhaka, Bangladesh

- Accelerated production deliveries using React.js, Node.js, and GitHub Copilot to streamline asynchronous API workflows and centralized data architectures.
- Built scalable data-fetching pipelines featuring automated error boundary classification and agentic log analysis for distributed microservices.
- Improved cloud operations reliability by containerizing system environments with Docker and configuring autonomous testing within CI/CD release cycles.

KEY PROJECTS

TypeRush – Cognitive Terminal | React 19, Gemini 3.5, Firestore, Web Audio API
Github Live

- Built an AI-powered immersive typing game with real-time kinetic word mechanics in a sci-fi cockpit interface.
- Designed interactive HUD with dynamic targeting system, adaptive visuals, and audio-reactive typing experience.

RankFlow AI – Agentic EdTech | Claude, Google AI Studio, React, Firebase
Github Live

- Developed an adaptive learning platform utilizing Claude APIs for OCR processing, multilingual data parsing, and smart user state synchronization.
- Optimized high-throughput asynchronous MCQ rendering engines to scale under heavy user load.

The Ink Home – Automated Web | Next.js 15, GitHub Actions, Vercel Live

- Built SEO-optimized publishing platform using static generation and responsive UI architecture.
- Implemented CI/CD pipelines via GitHub Actions for automated deployment workflows.

InteractIQ – AI Business OS | Next.js, TypeScript, Google AI Studio, WebSockets
Github

- Built AI automation platform with Next.js, TypeScript, WebSockets enabling real-time conversational workflows.
- Designed scalable dashboards with AI integration, state sync, and high-throughput visualization systems.

SafeSide Analytics | Next.js, TypeScript, WebSockets

Github

- Built real-time analytics dashboard using WebSockets for live data streaming.
- Engineered low-latency client-server architecture for interactive visualization systems.

EDUCATION

B.Sc. in Computer Science

RUET (2018 – 2022)

Score: 73.75%

SKILLS

Frontend & Backend

React, Next.js, TypeScript, Node.js, Express, Redux Toolkit, Zustand, REST/GraphQL APIs

Cloud & DevOps

Supabase, PostgreSQL, Docker, GitHub Actions, Linux, Firebase Cloud Functions

Core Methodologies

System Design, Autonomous Monitoring, Performance Optimization, Agile, Secure Architectures, Multi-Agent Workflows

AI TOOLING & SOFTWARE ECOSYSTEM

Agentic AI & LLMs Orchestration

Claude Code, Claude 3.5 Sonnet, Google AI Studio, Gemini API, Prompt Orchestration

Next-Gen IDEs & Code Intelligence

Antigravity IDE, GitHub Copilot, Cursor, Code Interpreter, Vercel V0

Autonomous Automation

Self-Healing CI/CD, Function Calling Pipelines, Advanced Automated Testing

LEADERSHIP & ACTIVITY

- AI Writer, Medium:** Publish on multi-agent engineering, Antigravity IDE, and performance.
- Organizer, Hult Prize:** Coordinated workflows and sprint timelines for cross-functional teams.

CERTIFICATIONS

- Meta:** Full Stack Web Development
- Google:** Technical Writing
- IBM:** Cloud Computing

AWARDS

- Featured Author – Medium (2025)
- Top 10 – Hult Prize RUET (2023)

LANGUAGES

Bengali (Native)
English (Fluent)
Hindi (Conversational)
