SUMMARY

AI-focused Full Stack Engineer with 4+ years of experience building scalable web architectures and robust LLM-driven applications. Specialized in multi-agent workflows, API integrations, and cloud infrastructure using React, Node.js, and generative AI frameworks. Proven track record of accelerating development cycles, implementing automated testing pipelines, and improving application performance by up to 40% through optimized deployment strategies and system design.

EXPERIENCE

Lead Full Stack Engineer

Auto Spark 🌐

April 2024 – Present

Rajshahi, Bangladesh

- Migrated a legacy platform to a bilingual Next.js/Supabase architecture, accelerating development velocity using LLM-assisted code generation pipelines.
- Deployed automated booking validation systems and API-driven data sync pipelines, significantly improving operational reliability and workflow efficiency.
- Increased overall application performance by 40% through strategic code-splitting, Server-Side Rendering (SSR) optimization, and automated monitoring setups.

Full Stack Developer (Remote)

Hire My Tech 🌐

Aug 2022 – July 2023

Dhaka, Bangladesh

- Streamlined asynchronous API workflows and centralized data architectures using React.js and Node.js, accelerating production delivery timelines.
- Architected scalable data-fetching pipelines featuring automated error handling and centralized logging for distributed microservices.
- Enhanced deployment reliability by containerizing system environments with Docker and integrating autonomous testing into CI/CD release cycles.

EDUCATION

B.Sc. in Computer Science and Engineering

Rajshahi University of Engineering and Technology (RUET)

2018 – 2022 | Score: 73.75%

SKILLS

- **Frontend & Backend:** HTML, CSS, JavaScript, TypeScript, React, Next.js, Node.js, Express, Redux, Zustand, REST/GraphQL.
- **Cloud & DevOps:** Supabase, PostgreSQL, Docker, GitHub Actions, Linux, Firebase Cloud Functions.
- **Core Practices:** System Design, Performance Optimization, Secure Backend Architecture, CI/CD, Monitoring, Multi-Agent Workflows.
- **AI & LLM Tooling:** Claude, Gemini, Google AI Studio, Antigravity IDE, GitHub Copilot, Cursor, Prompt Orchestration.

KEY PROJECTS

Auto Spark BD | React, TypeScript, Tailwind, Supabase

[GitHub] [Live]

- Architected a production-ready bilingual dealership platform integrating PostgreSQL Row Level Security (RLS) for centralized data authorization and real-time CRM routing.
- Implemented selective font subsetting and dynamic code-splitting via Vite, securing 90+ Lighthouse performance scores across core e-commerce routes.

FarhanOS | React 19, Gemini API, Node.js

[GitHub] [Live]

- Built a windowed web interface integrating a real-time LLM orchestrator for contextual retrieval and automated task execution.
- Architected a full-stack, node-based workflow engine to process inference requests and manage intelligent conversational data.

RankFlow AI | React, Redux, Tailwind, Firebase

[GitHub] [Live]

- Developed an education platform incorporating OCR-based data ingestion and intelligent content state management.
- Optimized high-throughput data workflows to support real-time assessment rendering and personalized learning analytics.

TypeRush | React 19, Gemini API, Firestore

[GitHub] [Live]

- Engineered a high-performance web application utilizing Web Audio APIs and real-time state updates to drive interactive kinetic typing mechanics.
- Designed a responsive HUD with dynamic targeting algorithms and adaptive visual feedback systems.

The Ink Home | Next.js 15, TypeScript, Tailwind

[GitHub] [Live]

- Built an SEO-optimized publishing architecture utilizing static site generation (SSG) for high-performance content delivery.
- Orchestrated CI/CD workflows via GitHub Actions to ensure system reliability and automate deployment pipelines.

SafeSide Analytics | Next.js, TypeScript, WebSockets

[GitHub] [Live]

- Developed a real-time streaming analytics dashboard using WebSockets for low-latency live data visualization.
- Engineered a scalable client-server architecture capable of supporting interactive, high-concurrency data processing.

SOFTWARE SKILLS

- **Version Control:** Git, GitHub
- **Development Tools:** Visual Studio Code, Docker, Jenkins
- **LaTeX:** Overleaf.com
- **Design Tools:** Canva, Figma, Adobe Photoshop, Adobe Illustrator
- **Video Editing:** Adobe Premiere Pro, Davinci Resolve, Final Cut Pro, VN
- **Platforms:** macOS, Windows, Linux

LEADERSHIP

- **Editor & Writer, Activated Thinker / The Ink Home:** Publish technical articles on AI workflows, automation, and full-stack engineering.
- **Organizer, Hult Prize RUET:** Managed cross-functional team workflows and sprint timelines during high-pressure events.

PUBLICATIONS

- **Primary Author:** "AI-Driven Live Interview System for Real-Time Candidate Evaluation Using NLP and Computer Vision" – Int. Conf. on Computer and Information Technology (ICCIT), 2026. [Paper Link]
- **Primary Author:** "Emotion Detection From Textual Data Using Natural Language Processing and Machine Learning Techniques" – 4th Int. Conf. on Electrical, Computer and Communication Engineering (ECCE), 2025. [Paper Link]
- **Primary Author:** "Depression Detection From Social Media Textual Data Using Natural Language Processing and Machine Learning Techniques" – 26th Int. Conf. on Computer and Information Technology (ICCIT), 2023. [Paper Link]

CERTIFICATIONS

- **Meta:** Full Stack Web Development
- **Google:** Technical Writing
- **IBM:** Cloud Computing

AWARDS

- Featured Author – Medium (2025)
- Top 10 – Hult Prize RUET (2023)
